

ASHISH PRASAD

SOFTWARE DEVELOPER

ashishprasad949@gmail.com | Jamshedpur, Jharkhand, India | github.com/ashudevcode | linkedin.com/in/ashudevcode

TECHNICAL SKILLS

- **Languages:** JAVA, Python Golang, lua, bash/shell, C11, C++17, LaTeX
- **Tools:** git, vim, linux, make, gradlew, uv, love2d

WORK EXPERIENCE

Go Translogistics

Kolkata, West Bengal, Remote

Backend Developer - gotranslogistics.in

Aug 2024 – Oct 2024

- Built and maintained an admin dashboard for managing users, truckers, and logistics operations.
- Implemented role-based access, Cloudinary image upload, and RESTful APIs for user management.

IT Developers

Rourkela, Odisha, India

Full Stack Intern - itdeveloper.in

Jan 2023 – Mar 2023

- Built core features for an anonymous blogging platform, including secure posting, editing, and deletion.
- Optimized website for responsive design, ensuring seamless user experience across devices.

OPEN SOURCE CONTRIBUTION

OpenSauced

Oakland, CA, Remote

Insights dashboard Application - (458 Users)

Aug 2024

- Improved onboarding modal behavior, delivering smoother navigation by refactoring component logic.
- [PR #3660](#) – Contribution merged into main repository.

PROJECTS

Ponio gamepad

[Github](#)

- This application was written using C and Java, containing a Linux server and an Android client application.
- Ponio allows users to play AAA title games without purchasing an expensive controller. It runs on all Android devices requiring only >4MB storage and >80MB RAM
- The application uses the TCP protocol for communication and supports offline gamelay with ~0 ms latency

VeggiPrice

veggiprice.vercel.app | [Code](#) |

- The application is designed to solve inconsistent market pricing of vegetables
- It helps users to know vegetable prices by retrieving standardized prices from a government API and using an ML model called YOLO to identify vegetable images in realtime and avoid being misled by vendors
- Implemented the ML backend in Python, a Go API to serve price data from a government source, and vanilla JavaScript for a responsive user interface

Scraper

[Github](#)

- A Python CLI script to extract product details from Flipkart search results and store the data in a CSV file
- Designed to help users to find highest ratings and lowest price products, facilitating better purchasing decisions

Google Map Lite

dataselfieapp.vercel.app | [Code](#) |

- Integrated OpenStreetMap and ISS API for real-time location visualization.
- Developed a lightweight map app showing user and ISS locations with 99% accuracy.

Anonymous Writing Blog Web App

freedomblog.vercel.app | [Code](#) |

- Implemented automated content filtering using NLP to maintain a safe community.
- Designed intuitive UI/UX for seamless blog management and photo sharing.
- Built a full-stack blogging platform with React, TypeScript, Node.js, MongoDB, and Express.js.

Steam Game Recommendation System

| [Code](#) | [Live](#) |

- Processed 1,800+ game records to provide accurate, user-tailored suggestions.
- Engineered a recommendation engine using machine learning and NLP for personalization.

EDUCATION

Arka Jain University

Bachelor of Computer Applications

Mohanpur, Jharkhand

Oct 2022 – Apr 2024
